

Installation

- I. Copy the ol_feedburner.php file into your default WordPress plugin directory wp-content/plugins/
- II. Activate the plugin by logging into your WordPress administration area, going to 'Plugins', then clicking 'Activate' at the end of the 'FeedBurner Feed Replacement' row.
- III. Begin the configuration by going to 'Options' then clicking on the 'FeedBurner' submenu.
- IV. Follow the links to create your FeedBurner feeds, or if they already exist, simply fill in their URLs in the boxes provided.
- V. NOTE: If you're using the previous version of the plugin with the specific feedburner URL, that URL is no longer available. You will have to reset your FeedBurner feeds to point to your standard blog feed address.
- VI. Verify your URLs in the boxes, and click save.
- VII. At this point, all your feed URIs should be redirecting to FeedBurner.

Deactivation

- I. To deactivate your feeds from forwarding to FeedBurner, simply deactivate the plugin via the Plugins admin.
